Fuse holders can be used in any applications where you need to ensure electrical protection, insulation and switching under load of inductive or resistive loads. The technology solutions applied to reduce power dissipation help to minimize module heating.  
 Fuse holders are suitable for protection against overloads and short circuits.

Rating	10A 250VAC
Fuse Size	6x30mm
Material	Plastic and Metal
Wire Length	23mm
Operating Temperature	-55°C--+85°C
OEM or ODM	Available
