NOTE	<ol style="list-style-type: none"> All parameters NOT specially mentioned are measured at 230Vac input, rated load and 25°C of ambient temperature. Measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1 uF & 47uF parallel capacitor. The SPS is considered a component which will be installed into final equipment. The equipment must be re-confirmed that it still meets EMC directives. Powerltd offer accessories for Din-35 rail bar. Please contact sales staff for details.
